ABSTRACT

A study examined the educational and employment activities of members of Minnesota's high school class of 1989. Data regarding 14,636 students (14,024 graduates, 324 dropouts, and 288 students school leavers not classified as dropouts) were collected from 97 high schools participating in the Minnesota Secondary School Follow-up System and from 853 of the students' employers. Current employment/education-related activities of the class of 1989 were also analyzed by curriculum area, and trend data covering the years 1978 through 1989 were summarized. At the time of the survey, 33 percent of the class members were both employed and attending a school, 22.4 percent were employed only, 1.8 percent were unemployed and not attending a school, and 24 percent were involved in education only. The percentage of individuals employed and not simultaneously attending any school has generally declined since 1978, whereas the percentage of individuals participating in education only has remained fairly steady. (Appended are lists of secondary schools participating in the project and the specific industries and occupations within categories reported, the base data coding form, and selected survey questionnaires. Also included are 34 figures and 165 tables.) (MN)

ACKNOWLEDGEMENTS

The author wishes to acknowledge the Minnesota Board of Vocational-Technical Education and the Minnesota State Board of Education for their support of this project. Thanks goes to Dolores Pospesel, Follow-up Specialist, State Board of Vocational-Technical Education, for lending encouragement, leadership and guidance to the entire effort.

The contributions of the participating local education agencies, local project directors and clerical staff for making special efforts to accurately collect and code the student data for nearly 15,000 former students is deeply appreciated.

Special thanks are extended to those who have helped make the system work -- to John Ferguson who coordinated the interrelationship between the micro and the mainframe computers to generate reports.

Michelle Day who has supported all phases of the system, deserves a very special recognition. She has been responsible for the careful typing and diagramming of this report, in addition to generating local and State data as requested.

The support of all of these people to the project has been invaluable.

Chapter 1:

INTRODUCTION

At the end of each school year, about 60,000 students graduate from high schools in Minnesota. Additionally, there are several thousand students who leave without diplomas. Based upon the assumption that a high school education is a means to some future end rather than an end in and of itself, it is important to identify "what happens" to students after they leave high school.

This information, along with other data (i.e., economic, school programs, etc.), may be used to improve student services. It can also enhance curriculum development, program planning, and evaluation efforts.

This publication presents a summary of the research obtained from senior high schools in Minnesota which utilized the Minnesota Secondary School Follow-Up System to collect data on the class of 1989. There were 97 high schools collecting information from 14,636 students. Of this total; 14,024 students were graduates, 324 were classified as dropouts and 288 were defined as having left high school without a diploma but not classified as dropouts.

BASIC MODEL

The Minnesota Secondary School Follow-Up System is a data collection and reporting system to be used by local education agencies (LEAs) to gather information from present and former students.

The System was originally developed by the Minnesota Research and Development Center for Vocational Education, at the University of Minnesota, under contract with the Minnesota State Department of Education, Division of Vocational-Technical Education.

The Follow-Up System, initiated in 1972, was designed to provide useful information for the State and LEAs in areas such as curriculum development, program planning, evaluation, guidance and counseling. The System has been adapted to help LEAs meet both State and Federal reporting requirements, as these requirements relate to the post-high school activities of former students.

Although the System was developed under grant by the Vocational Division and provides information for vocational reporting, it does provide equally valuable information on all former students in all program areas.

In 1982 the University's direct involvement in the System terminated. A group of local administrators concerned that this proven data collection might no longer be available, approached the State Department of Education to maintain it.

Under grants from the State Department of Education a joint project intended to maintain the System was initiated. The University developed a software program to be used by LEAs for data entry utilizing an Apple II system. The Mounds View Schools have developed software to read the Apple data disks into a Burroughs mainframe for processing local and State reports.

The System is designed as a decentralized data collection operation, (See Figure 1). That is, the LEA is provided a common set of instruments and procedures in regional training sessions. Actual data collection and data entry are then carried out independently by the LEA. The data disks are submitted to the Mounds View Schools for data analysis and report generation. The service is provided under a grant with the State Department of Education.

Although most districts have utilized the System to conduct one-year follow-up studies, the procedures and programs can be used identically to conduct others-typically three and five-year studies. Follow-up forms are available upon request to the local project directors for such studies. Processing is provided without charge to the local district, as per the one-year plan.

The selection of this decentralized model was based on the following factors/assumptions:

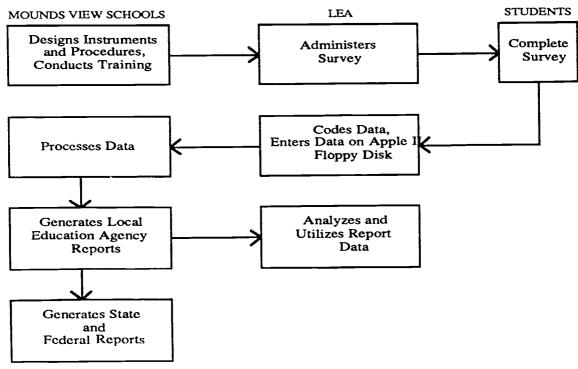

- 1. Local district participation maximizes the possibility that the data will be appropriate, and therefore used;
- 2. Students are more likely to respond to a questionnaire from the high school as compared to a central state agency; and
- 3. The large number of school districts involved would make centralized data collection costs prohibitive.

In addition to these factors, several goals were established for the system. The goals are that the system will:

- 1. Provide information necessary to meet local, state, and federal reporting requirements;
- 2. Provide data which will be useful in assisting local and state personnel in planning and evaluating educational programs;
- 3. Provide a basis for the comparisons of plans prior to leaving high school with actual activities one year later;
- 4. Produce a high rate of response;
- 5. Be of reasonable cost; and
- 6. Provide consistent information across schools.

The data collected from the Class of 1989 are reported in the following chapters. Chapter 2 presents a summary of activities for all respondents, as well as comparative data from the classes of 1977-1981 and 1983-1988. Because the system was interrupted for 2 years, follow-up data are unavailable for the Class of 1982, as well as career planning data for the Class of 1983. Chapter 3 presents a comparison of the plans versus the actual activities of the Class of 1989. The data on the plans of the Class of 1989 were collected via the Career Planning Survey component of the Follow-Up System. The Career Planning Survey is administered to high school seniors about one month prior to their graduation date. Chapter 4 is a summary of the class by curriculum area, and shows the potential relationships between the amount of coursework taken and post high school employment and educational activities. Chapter 5 presents information collected by a survey of employers of members of the Class of 1989.

FIGURE 1
MINNESOTA SECONDARY SCHOOL FOLLOW-UP SYSTEM

Chapter 2:

SUMMARY OF THE CLASS OF 1989

Using the procedures outlined in Chapter 1, 97 Minnesota high schools conducted a follow-up survey of the Class of 1989. Included in this survey were graduates and dropouts, as well as other members of the class who didn't complete their high school program. This chapter of the report will: (1) describe selected characteristics of those 97 schools reporting follow-up data, (2) present a statewide summary of the Class of 1989, and (3) present summary data for the classes of 1977 through 1988. (Statewide follow-ups were not conducted on the Class of 1982). Summary data over several years allows for the examination of trends over time.

CHARACTERISTICS OF PARTICIPATING SCHOOLS

Each district which offers vocational education is required to participate in the Minnesota Secondary School Follow-Up System every five years. Each year other districts voluntarily participate. Therefore, the schools included in this report do not represent a random sample, nor do they comprise a sample which would necessarily be valid for statistical inference to the population of all schools in Minnesota. However, the schools that participated in the follow-up are diverse in terms of class size and geographic location within Minnesota; and may, for practical purposes, be considered representative of the schools in the State.

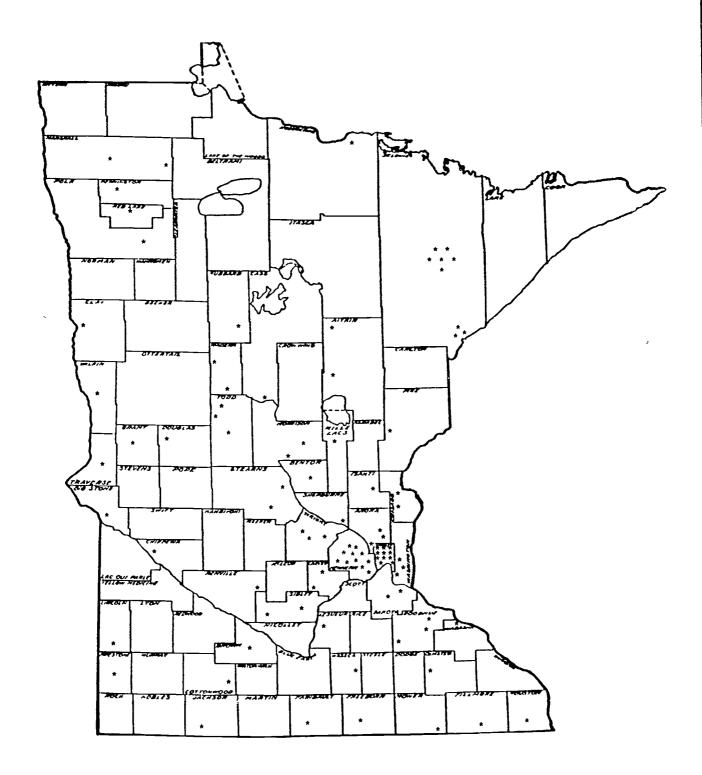

LOCATION

The geographic locations of the 97 schools that reported data from the Class of 1989 are shown in Figure 2. Each participating school is identified with an asterisk (*), and is located in the appropriate county. As shown in Figure 2, the participating schools were widely dispersed throughout the state.

(A list of participating schools may be found in Appendix A.)

FIGURE 2 LOCATION OF SCHOOLS PARTICIPATING IN THE FOLLOW-UP PROJECT IN 1989

SIZE OF GRADUATING CLASS

The second factor used to describe the schools that participated in the follow-up is the size of graduating class. The number of schools by size of graduating class is reported in Table 1.

As shown in Table 1, 65 schools, or two-thirds of participating schools surveying the Class of 1989 had a graduating class size of 200 students or less.

TABLE 1
NUMBER OF SCHOOLS BY SIZE OF GRADUATING CLASS

Size of Class	1989	1988	1987	1986	1985	1984	1983	1981	1980	1979	1978	1977

^{*} Plus a sample of Minneapolis district-wide.

QUESTIONNAIRE RESPONSE

The student response rate to the follow-up questionnaire is shown in Table 2. The "Return Complete" category identifies the percentage of former students who returned fully completed questionnaires. The "Return Incomplete" category identifies the percentage of former students who returned partially completed questionnaires. The "No Return Received" category reports the percentage that did not respond to the follow-up questionnaire.

As shown in Table 2, 65.7 percent of those surveyed responded with a fully completed questionnaire. Nearly ten percent responded with a partially completed questionnaire. The total response rate to the questionnaire was 75.6 percent.

TABLE 2 QUESTIONNAIRE RESPONSE CLASS OF 1989 - ALL STUDENTS

Status	Male Percent	N	Female Percent	N	Total Percent	N	% Change From 1988
Return Complete	62.3	4563	69.1	5054	65.7	9617	- 4.6

Total Assessed	100.0	7325	100.0	7311	100.0	14636	

COMBINATIONS OF PRESENT ACTIVITIES

Table 3 represents a detailed description of the activity status one year after high school for the Class of 1989. These selected categories were designed to be independent and mutually exclusive, thus providing non-duplicated counts.

As shown in Table 3, 22.4 percent of the Class of 1989 were "employed only" at the time of the survey. Only 1.8 percent were "unemployed only" at the time of the survey. Of those responding, twenty-four percent were involved in education only, while thirty-three percent were attending a school and employed.

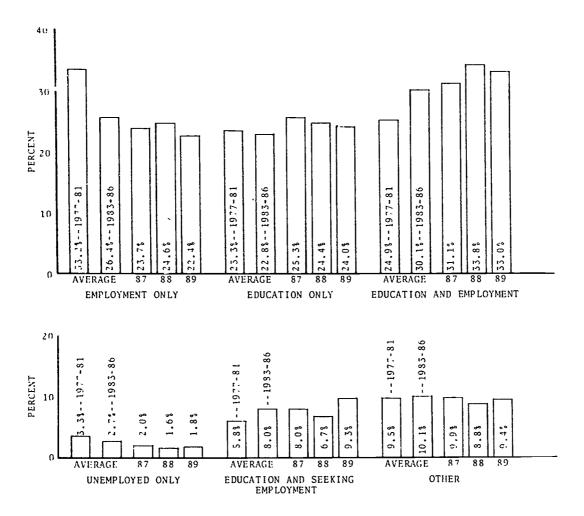

Figure 3 illustrates the trends in the combinations of activities. As can be seen, the percentage responding "employed only" has generally declined since 1978. Likewise, the percentage listed as "education only", with only 1983 as an exception, has remained quite steady. In the years 1977 through 1981 a fairly constant 25 percent reported education and employment. In 1983 this percentage increased substantially to 30 percent, and has held at this level for the succeeding six graduating classes.

EDUCATIONAL ACTIVITY

The educational activities of the Class of 1989 are summarized in Table 4. 45.6 percent of the class were enrolled in a four-year college or university at the time of the follow-up. 9.8 percent of the class were enrolled in a vocational school and 12.5 percent in a community college. Approximately one-third of the Class of 1989 had no educational activities at the time of the follow-up survey.

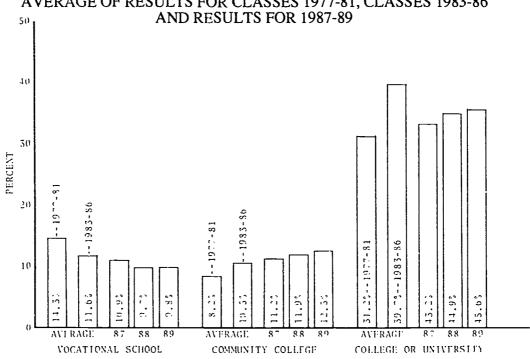

As can be seen in Figure 4, the total educational activities of leavers of Minnesota high schools is increasing slightly over time.

EDUCATION TIME STATUS

Table 5 indicates the time status for individuals in school at the time of the follow-up survey. Almost eighty-five percent of those individuals attending an educational institution were doing so full-time. Full-time was defined as being enrolled for 13 or more hours per week for students attending colleges or universities.

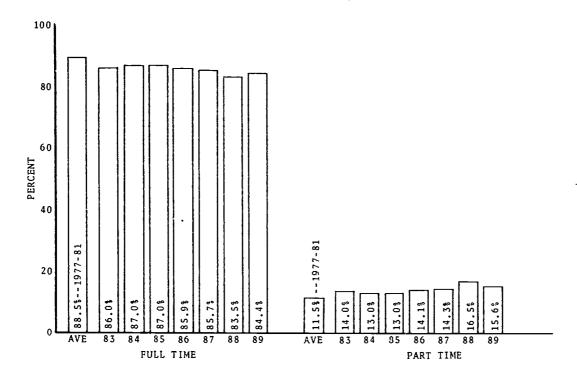

Figure 5 represents the trend data for education time status. As can be seen, a fairly constant rate of almost 90 percent full-time for those individuals attending school has been maintained over the past twelve studies.

FIGURE 5 TIME STATUS FOR INDIVIDUALS ATTENDING POST-SECONDARY INSTITUTIONS AT PRESENT AVERAGE OF RESULTS FOR CLASSES 1977-81, AND RESULTS FOR 1983-89

SCHOOLS ATTENDED BY INDIVIDUALS AT PRESENT

The percentages reported in Table 6 are intended to illustrate the type of post-secondary institution attended by students of the Class of 1989 ten to eleven months after leaving high school. Of those former students reporting an educational activity, 11.7 percent were attending a technical college; 16.2 percent were attending the University of Minnesota; 14.1 percent were attending a state university; 15.7 percent were attending a community college. One-third reported attending a Minnesota private college (14.1%) or an institution outside of Minnesota (22.1%).

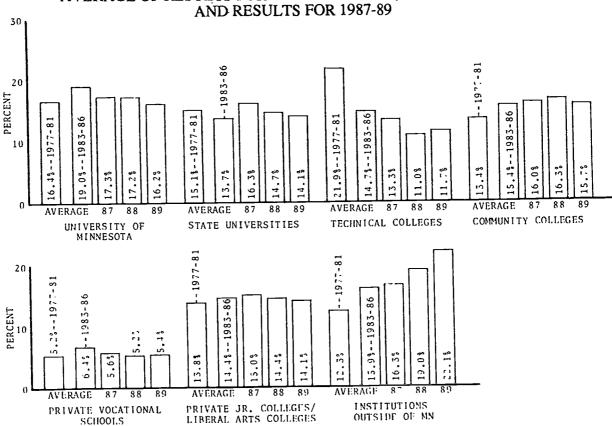

Figure 6 illustrates the proportion of those former students who reported enrollment by type of institution from 1977 to 1989.

EMPLOYMENT ACTIVITY

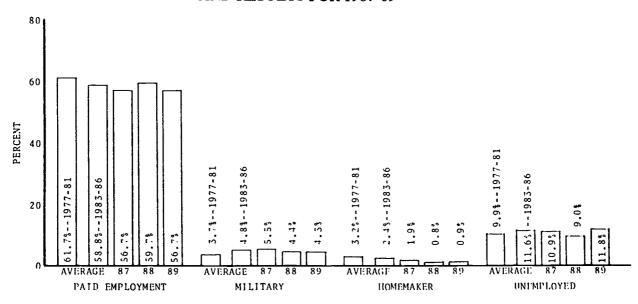

The employment activities of the Class of 1989 are summarized in Table 7. Nearly sixty percent of the class were employed at the time of the follow-up survey. While it appears that twelve percent of the class were unemployed, this figure includes those former students who are primarily in school but also seeking employment. A better understanding of the unemployment figure for the Class of 1989 may be obtained in Table 3, "Combination of Present Activities" which indicates an "unemployed only" status of 1.8 percent.

Figure 7 illustrates the employment activities of the Class of 1977 through 1989. It is apparent that the proportion of each class stating any employment related activity has varied from approximately 75 to 85 percent.

TABLE 7

FIGURE 7
PRESENT EMPLOYMENT ACTIVITY
AVERAGE OF RESULTS FOR CLASSES 1977-81, CLASSES 1983-86
AND RESULTS FOR 1987-89

EMPLOYMENT TIME STATUS

The time status for individuals employed is reported in Table 8. Full-time was defined as being employed 30 or more hours per week. Part-time was defined as being employed 29 or fewer hours per week.

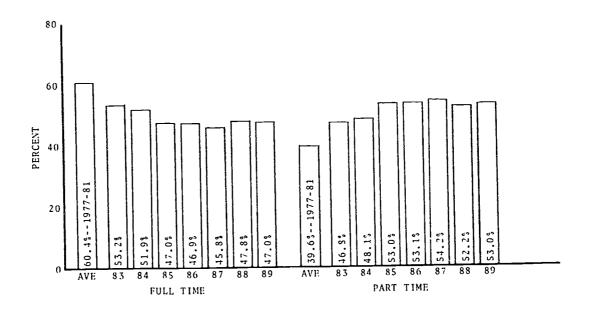

As shown in Table 8, forty-seven percent of the Class of 1989 reporting employment were employed full-time, with fifty-three percent of the class employed part-time.

The twelve-year trend data reported in Figure 8 reveals the tendency toward part-time employment for those former students employed. It should be noted that employment time status may be affected by participation in post-secondary education activities which have also changed over the past seven years.

WAGES EARNED BY INDIVIDUALS EMPLOYED AT PRESENT

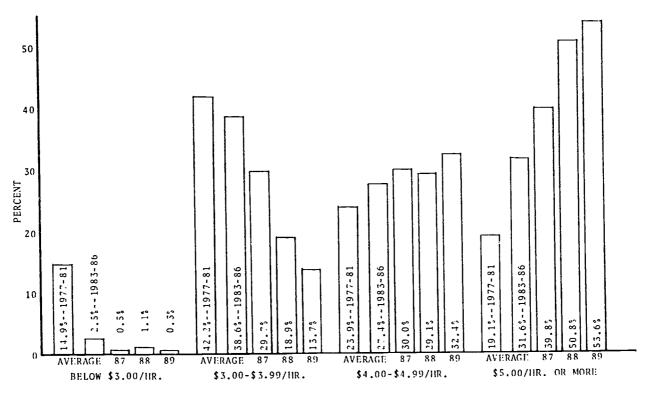

The wage distribution of the Class of 1989 who were employed at the time of the follow-up survey is reported in Table 9. About half reported earning \$3.00 to \$4.99 per hour. Over fifty percent of the class reported earning \$5.00 or more per hour.

Figure 9 illustrates the wage distribution for the past twelve studies. Care should be exercised when interpreting these data due to changes in the minimum wage and inflation that have occurred over the period.

TABLE 9 WAGES OF INDIVIDUALS EMPLOYED AT PRESENT CLASS OF 1989 - ALL STUDENTS

WAGES FOR INDIVIDUALS EMPLOYED AT PRESENT
AVERAGE OF RESULTS FOR CLASSES 1977-81, CLASSES 1983-86
AND RESULTS FOR 1987-89

INDUSTRIES IN WHICH INDIVIDUALS ARE EMPLOYED AT PRESENT

The information presented in Table 10 categorizes the employment activities of former students by the type of industry in which they were employed at the time of the follow-up survey. The industry categories are the same as the broad reporting categories used by the United States Bureau of the Census.

Approximately forty percent of the Class of 1989 were employed in wholesale and retail trade. Twenty percent of the class were employed in professional and related services. Twelve percent of the class were employed by manufacturing firms.

Figure 10 illustrates the distribution of employment by industry for the past twelve years. The proportion employed in wholesale and retail trade has generally been between forty and fifty percent of all respondents.

FIGURE 10 INDUSTRIES IN WHICH RESPONDENTS ARE EMPLOYED AT PRESENT AVERAGE OF RESULTS FOR CLASSES 1977-81, CLASSES 1983-86 AND RESULTS FOR 1987-89

OCCUPATIONS IN WHICH INDIVIDUALS ARE EMPLOYED AT PRESENT

Information relative to the occupations in which individuals were employed at the time of the follow-up is presented in Table 11. The categories used in Table 11 were the same as used by the U.S. Bureau of the Census. For the purposes of this report, an expanded form of the suggested abbreviated occupational classifications (Standard Occupational Codes - SOC) has been used.

Incorporating the Standard Occupational Classification into the Minnesota Secondary School Follow-Up System has the benefit of keeping the System current and compatible with Federal government reporting procedures. However, due to this change only ten years of occupational trend data will be presented in this report.

As shown in Table 11, over two-thirds of those employed were employed in service, marketing and sales, or clerical occupations. Nearly ninety percent of females cluster in these three occupational areas, as opposed to less than half of males.

Figure 11 illustrates the changes that have taken place over the ten studies in proportion of employment by occupation. It is evident that the percentages have been relatively stable over the past six years.

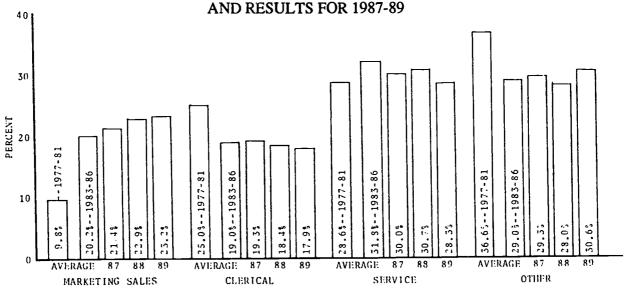

TABLE 11 OCCUPATIONS IN WHICH RESPONDENTS ARE EMPLOYED CLASS OF 1989 - ALL STUDENTS

Chapter 3:

PLANS VERSUS ACTUAL ACTIVITIES OF THE CLASS OF 1989

An integral part of the Minnesota Secondary Follow-Up System is the Career Planning Survey. The Career Planning Survey is administered to high school seniors approximately one month prior to their high school graduation date. The Career Planning Survey asks students questions concerning their high school program, basic skills, post high school plans, finality of plans, personal information, and family information. The Career Planning Survey data are analyzed and reported to each participating district.

The Follow-up component of the Secondary Follow-Up System, as stated in Chapter 1, gathers information on students' post high school activities approximately one year after students leave high school. The entire follow-up procedure links student base information, plans and post high school employment and/or educational activity.

Approximately 96 Minnesota high schools collected both Career Planning Survey and Follow-up data for the Class of 1989. These data were collected at two different time periods. The Minnesota Secondary Follow-Up System procedures insure that each student's Career Planning Survey and Follow-up data are correctly matched. This merge resulted in a data file containing 11,167 students.

The comparison of "plans versus actual activities" is accomplished via the students' combinations of plans/activities. The combinations of plans/activities was chosen because it allows for a better view of what the students are planning/doing with their time, in that a total picture of what a student is planning/doing is more apparent. It also creates mutually exclusive categories. Table 12 illustrates the combination of plans from the Class of 1989 as measured by the Career Planning Survey.

ACTUAL ACTIVITY OF THOSE PLANNING EMPLOYMENT ONLY

Of the members of the Class of 1989 who completed a Career Planning Survey, **8.2 percent**, or 913 indicated they planned to be <u>employed only</u> one year after leaving high school. Of the 8.2 percent, 635, or 69.5 percent, returned the follow-up form and indicated their present activity.

Of that 635, 73.9 percent, or 469 individuals, were actually employed only at the time of the follow-up survey. 66 people, or 10.4 percent of those planning employment only, were also employed, but in combination with another activity, such as attending a vocational school. Therefore, 84.5 percent, or 535 of the 635 planning employment only and who returned the follow-up survey, were engaged in employment at the time of the study.

FIGURE 12 PLANS OF THE CLASS OF 1989 VERSUS THE ACTUAL ACTIVITIES OF THOSE PLANNING EMPLOYMENT ONLY

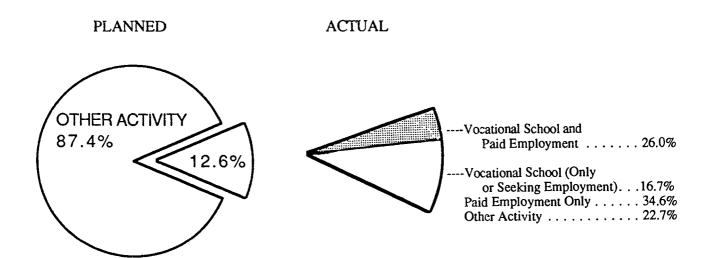

ACTUAL ACTIVITY OF THOSE PLANNING EMPLOYMENT AND VOCATIONAL SCHOOL

Of the members of the Class of 1989 who completed a Career Planning Survey, 12.6 percent, or 1,402, indicated they planned to be employed <u>and</u> attending a vocational school one year after leaving high school. Of the 12.6 percent, 1,056 former students, or 75.3 percent, returned the follow-up form and indicated their present activity. Of that 1,056, 275 individuals, or **twenty-six percent** were actually employed <u>and</u> attending a vocational school at the time of the follow-up survey. 34.6 percent, 365 of those planning employment and vocational school, were involved in employment only. Some of those may have completed a vocational program between high school completion and the time of the survey. 176 (16.7 percent) were engaged in either vocational school only or vocational school and seeking employment.

Upon further study of what those planning vocational school were doing in the three time periods between graduation and the study, 52.7 percent of this group actually attended vocational school at some time during the year. It is difficult to determine the retention statistics for vocational schools since vocational programs vary greatly in length.

FIGURE 13 PLANS OF THE CLASS OF 1989 VERSUS THE ACTUAL ACTIVITIES OF THOSE PLANNING EMPLOYMENT AND VOCATIONAL SCHOOL

ACTUAL ACTIVITY OF THOSE PLANNING EMPLOYMENT AND COMMUNITY COLLEGE

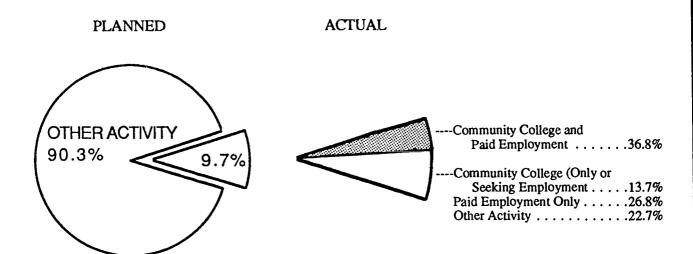

Of the members of the Class of 1989 who completed a Career Planning Survey, 9.7 percent, or 1,080, indicated they planned to be employed <u>and</u> attending a community college one year after leaving high school. Of the 9.7 percent, 824 former students, or 76.3 percent, returned the follow-up form and indicated their present activity.

Of that 824, 36.8 percent, or 303 individuals, were actually employed <u>and</u> attending a community college at the time of the follow-up survey. Over one-fourth (26.8 percent or 221 individuals) of those planning employment and community college were employed only. Another 13.7 percent (113 former students) were either attending a community college only or attending one and seeking employment.

Therefore, at the time of the follow-up, 50.5 percent of those planning employment and community college were enrolled in a community college.

63.1 percent had been involved in community college at some point during the year since the class-graduated.

FIGURE 14
PLANS OF THE CLASS OF 1989 VERSUS THE ACTUAL ACTIVITIES OF THOSE
PLANNING EMPLOYMENT AND COMMUNITY COLLEGE

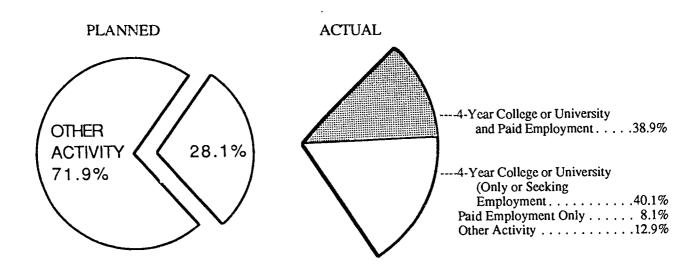

ACTUAL ACTIVITY OF THOSE PLANNING EMPLOYMENT AND COLLEGE OR UNIVERSITY

Of the members of the Class of 1989 who completed a Career Planning Survey, 28.1 percent, or 3,135, indicated they planned to be employed <u>and</u> attending a college or university one year after leaving high school. Of the 28.1 percent, 2,596 former students, or 82.8 percent, returned the follow-up form and indicated their present activity.

Of that 2,596, 38.9 percent, or 1,011 individuals, were actually employed and attending a college or university at the time of the follow-up survey. Another 1,040 individuals (40.1 percent) were attending a college or university, either exclusively or also seeking employment. 8.1 percent (209) were employed only. At the time of the follow-up, seventy-nine percent of those planning to be employed and attending a college or university were attending a college or university. 51.8 percent were engaged in some form of employment.

Upon further study of what those planning this activity were doing in three-month increments following graduation, it appears that nearly **ninety percent** attended a college or university at some point during the year.

FIGURE 15
PLANS OF THE CLASS OF 1989 VERSUS THE ACTUAL ACTIVITIES OF THOSE PLANNING EMPLOYMENT AND 4 YR. COLLEGE OR UNIVERSITY

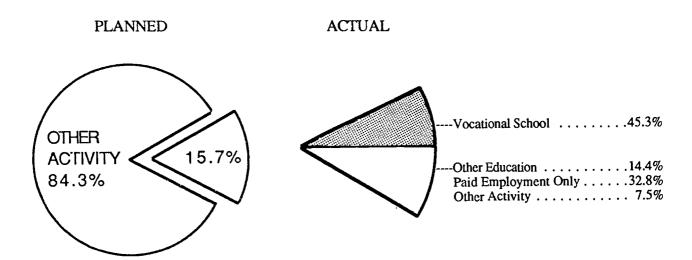

ACTUAL ACTIVITY OF THOSE PLANNING VOCATIONAL SCHOOL

Of the members of the Class of 1989 who completed a Career Planning Survey, 15.7 percent, or 1,756, indicated they planned to be attending a vocational school one year after leaving high school. Of the 15.7 percent, 1,331 former students, or 75.8 percent, returned the follow-up form and indicated their present activity.

Of that 1,331, 45.3 percent, or 603 individuals, were actually attending a vocational school at the time of the follow-up survey. 192 people, or 14.4 percent, were attending another form of education. 32.8 percent, or 437 individuals were employed only at the time of the follow-up. Some of these may have completed their vocational program prior to the survey.

In studying the three-month time increments between the classes' graduation and the time of the follow-up study, it appears that fifty-five percent of this group did attend a vocational school at some time. It is difficult to determine the retention statistics for vocational schools since vocational programs vary greatly in length.

FIGURE 16
PLANS OF THE CLASS OF 1989 VERSUS THE ACTUAL ACTIVITIES OF THOSE
PLANNING VOCATIONAL SCHOOL

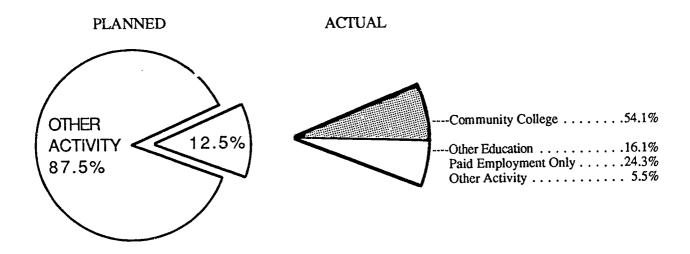

ACTUAL ACTIVITY OF THOSE PLANNING COMMUNITY COLLEGE

Of the members of the Class of 1989 who completed a Career Planning Survey, 12.5 percent, or 1,400, indicated they planned to be attending a community college one year after leaving high school. Of the 12.5 percent, 1,077 former students, or seventy-seven percent, returned the follow-up form and indicated their present activity.

Of that 1,077, **54.1 percent**, or 583 individuals, were actually attending a community college at the time of the follow-up survey. Another 173 people, or 16.1 percent, were involved in another form of education. 24.3 percent (262 people) were employed only at the time of the survey.

In reviewing the activities of this group for the three-month intervals since graduation, it is estimated that nearly two-thirds did attend a community college at some point.

FIGURE 17
PLANS OF THE CLASS OF 1989 VERSUS THE ACTUAL ACTIVITIES OF THOSE
PLANNING COMMUNITY COLLEGE

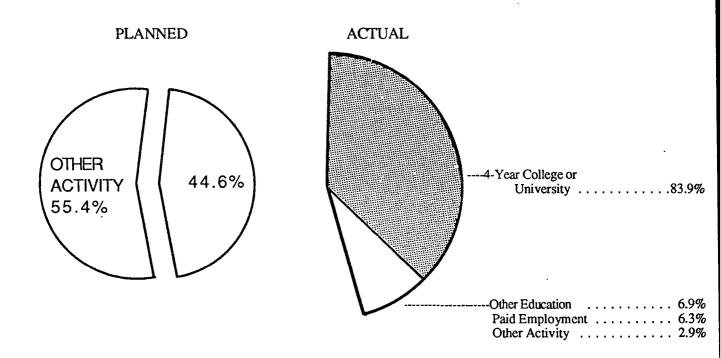

ACTUAL ACTIVITY OF THOSE PLANNING COLLEGE OR UNIVERSITY

Of the members of the Class of 1989 who completed a Career Planning Survey, **44.6 percent**, or 4,978, indicated they planned to be attending a college or university one year after leaving high school. Of the 44.6 percent, 4,169 former students, or 83.7 percent, returned the follow-up form and indicated their present activity.

Of that 4,169, 83.9 percent, or 3,497 individuals, were attending a college or university at the time of the follow-up survey. Another 288 individuals, or 6.9 percent, were engaged in another form of education. Of the students indicating college or university plans, 261 (6.3 percent) were employed only at the time of the survey.

Because former students were asked to report their post high school activity in three-month increments, it was learned that over **ninety percent** of those in this category who reported did attend a college or university at some point during the year following graduation of the class.

FIGURE 18
PLANS OF THE CLASS OF 1989 VERSUS THE ACTUAL ACTIVITIES OF THOSE
PLANNING 4 YR. COLLEGE OR UNIVERSITY

Chapter 4:

SUMMARY OF THE CLASS OF 1989 BY CURRICULUM AREA

In addition to collecting follow-up information from their former students, the 97 schools which participated in the follow-up system also reported classes which these students took while in high school.

The curricular areas were drawn from Handbook VI, "Standard Terminology for Curriculum and Instruction in Local and State School Systems," developed by the National Center for Educational Statistics. The curricular areas used were:

Agriculture*

Art

Business

Distributive Education*

English

Foreign Language

Health Occupations*

Health-Physical Education

Home Economics*

Industrial Technology

Mathematics

Music

Natural Science

Office Occupations*

Service Occupations*#

Social Studies

Trade and Industrial Education*

By using these categories, it was possible to identify and summarize the post-high school activities of students who took courses in each category. These summaries are presented in the following sections of this chapter.

In each section, nine tables are used to summarize the data reported by each group of students. These data are broken down into 200 hour cohorts to better illustrate the possible relationships between number of course hours taken and post-high school education and employment activities. The authors wish to point out that these are to be observed as mere relationships, not causes and effects. A breakdown by sex is also presented. It should be noted that in some cases columns do not total 100% due to rounding.

Because each curriculum section is reported in a manner to allow for separate use, tables and figures are not numbered as in other chapters.

^{*} Represents a vocationally reimbursed curriculum area.

[#] Represents a curriculum area not included in Handbook VI.

CLASS OF 1989 AGRICULTURE STUDENTS

Agriculture classes were selected by 9.9 percent of the 14,636 students who participated in the followup study. The data reported in this section include the 1,453 students who completed one or more courses in the curriculum category of Agriculture.

Approximately three-fourths (74.4 percent) of the Agriculture students were male, and 25.6 percent were female. Of these students surveyed, 75.3 percent responded with a completed, or substantially completed, questionnaire. These data are broken down into two-hundred hour cohorts. Courses in this curriculum category include, but are not limited to: Agriculture Production, Farm Business Management, Farm Mechanics, and Ornamental Horticulture.

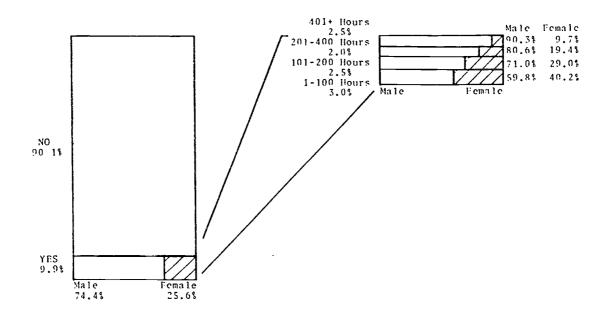

Of the 1,453 Agriculture students, 796 had from 1 to 200 hours of courses; 292 students had courses totaling 201 to 400 hours; 365 had 401 or more hours of course work. The total percentage of students who selected any Agriculture courses increased 0.6 over the Class of 1988 study.

CLASS OF 1989 ART STUDENTS

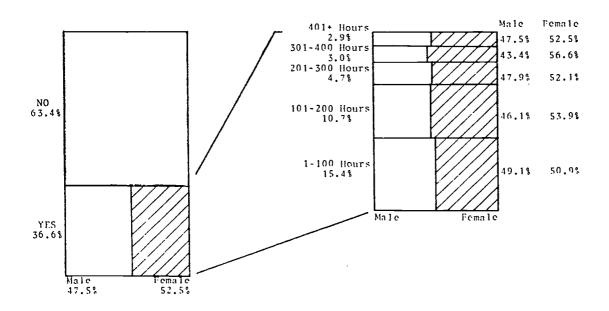

Art classes were selected by 36.6 percent of the 14,636 students who participated in the follow-up study. The data reported in this section include the 5,361 students who completed one or more courses in the curriculum category of Art.

47.5 percent of these Art students were male, and 52.5 percent were female. Of these students surveyed, 72.6 percent responded with a completed, or substantially completed, questionnaire. Courses in this curriculum category include, but are not limited to: Art History, Basic Design, Drawing, and Sculpture.

Of the 5,361 Art students, 3,814 had from 1 to 200 hours of courses; 1,127 students had courses totaling 201 to 400 hours; and 420 had 401 or more hours of course work. The total percentage of students who had selected any Art courses remained the same as the Class of 1988 study.

CLASS OF 1989 BUSINESS STUDENTS

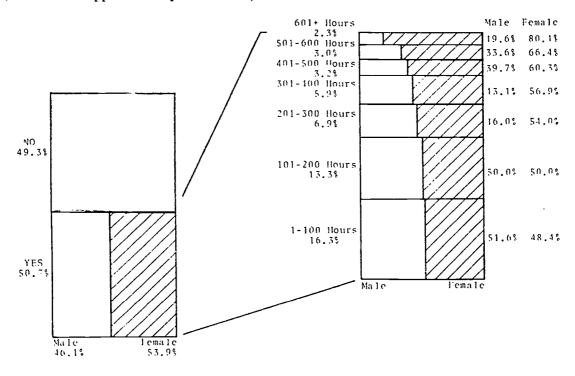

Business classes were selected by 50.7 percent of the 14,636 students who participated in the follow-up study. The data reported in this section include the 7,421 students who completed one or more courses in the curriculum category of Business.

46.1 percent of these Business students were male, and 53.9 percent were female. Of these students surveyed, 82.4 percent responded with a completed, or substantially completed, questionnaire. Courses in this curriculum category include, but are not limited to: Accounting Principles, Typewriting, Business Correspondence, and Business Law.

Of the 7,421 Business students, 4,314 had from 1 to 200 hours of courses; 1,862 students had courses totaling 201 to 400 hours; and 1,245 had 401 or more hours of course work. The total percentage of students who had selected any Business courses decreased 7.1 from the Class of 1988 study.

CLASS OF 1989 DISTRIBUTIVE EDUCATION STUDENTS

Distributive Education classes were selected by **9.4 percent** of the 14,636 students who participated in the follow-up study. The data reported in this section include the 1,376 students who completed one or more courses in the curriculum category of Distributive Education.

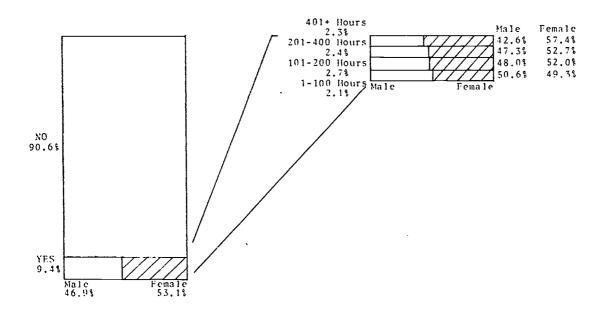

46.9 percent of the Distributive Education students were male, and 53.1 percent were female. Of these students surveyed, 73.9 percent responded with a completed, or substantially completed, questionnaire. Courses in this curriculum category include, but are not limited to: Advertising Principles, Principles of Marketing, Retailing, and Sales Management.

Of the 1,376 Distributive Education students, 694 had from 1 to 200 hours of courses; 347 students had courses totaling 201 to 400 hours; and 335 had 401 or more hours of course work. The total percentage of students who had selected any Distributive Education courses decreased 1.1 from the Class of 1938 study.

CLASS OF 1989 ENGLISH STUDENTS

English classes were selected by 95.5 percent of the 14,636 students who participated in the follow-up study. The data reported in this section include the 13,975 students who completed one or more courses in the curriculum category of English.

49.9 percent of these English students were male, and 50.1 percent were female. Of these students surveyed, 77.8 percent responded with a completed, or substantially completed, questionnaire. Courses in this curriculum category include, but are not limited to: American Literature, Grammar, Public Speaking, and Reading.

Of the 13,975 English students, 362 had from 1 to 200 hours of courses; 1199 students had courses totaling 201 to 400 hours; and 12,414 had 401 or more hours of course work. The total percentage of students who had selected any English courses decreased 3.1 from the Class of 1988 study.

CLASS OF 1989 FOREIGN LANGUAGE STUDENTS

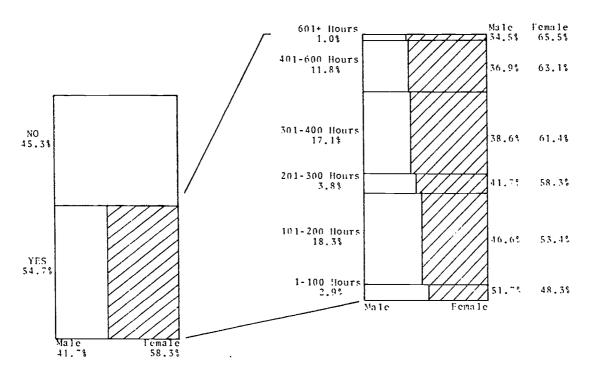

Foreign Language classes were selected by **54.7 percent** of the 14,636 students who participated in the follow-up study. The data reported in this section include the 8,001 students who completed one or more courses in the curriculum category of Foreign Language.

41.7 percent of these Foreign Language students were male, and 58.3 percent were female. Of these students surveyed, 82.5 percent responded with a completed, or substantially completed, questionnaire. Courses in this curriculum category include, but are not limited to: German, Spanish and French.

Of the 8,001 Foreign Language students, 3,084 had from 1 to 200 hours of courses; 3,051 students had courses totaling 201 to 400 hours; and 1,866 had 401 or more hours of course work. The total percentage of students who had selected any Foreign Language courses increased 3.8 over the Class of 1988 study.

CLASS OF 1989 HEALTH OCCUPATIONS STUDENTS

Health Occupations classes were selected by 2.5 percent of the 14,636 students who participated in the follow-up study. The data reported in this section include the 367 students who completed one or more courses in the curriculum category of Health Occupations.

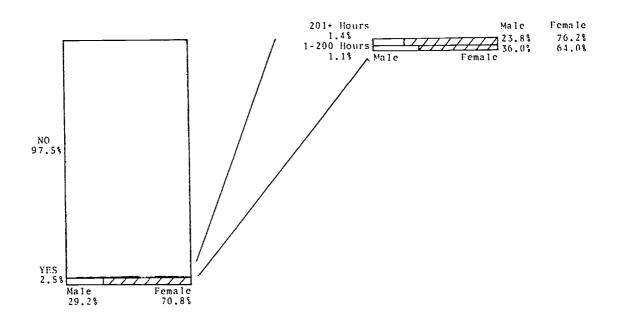

29.2 percent of these Health Occupations students were male, and 70.8 percent were female. Of these students surveyed, 75.5 percent responded with a completed, or substantially completed, questionnaire. Courses in this curriculum category include, but are not limited to: Dental Assisting, Home Health Aide, Medical Assistant, and Nursing Aide.

Of the 367 Health Occupations students, 160 had from 1 to 200 hours of courses; 153 students had courses totaling 201 to 400 hours; and 54 had 401 or more hours of course work. The total percentage of students who had selected any Health Occupations courses decreased .5 from the Class of 1988 study.

CLASS OF 1989 HEALTH-PHYSICAL EDUCATION STUDENTS

Health-Physical Education classes were selected by **93.6 percent** of the 14,636 students who participated in the follow-up study. The data reported in this section include the 13,693 students who completed one or more courses in the curriculum category of Health-Physical Education.

Fifty percent of these students were male, and fifty percent were female. Of these students surveyed, 78.1 percent responded with a completed, or substantially completed, questionnaire. Courses in this curriculum category include, but are not limited to: Health, First Aid, and Recreation.

Of the 13,693 Health-Physical Education students, 9,141 had from 1 to 200 hours of courses; 3,678 students had courses totaling 201 to 400 hours; and 874 had 401 or more hours of course work. The total percentage of students who had selected any Health-Physical Education courses decreased 3.4 from the Class of 1988 study.

CLASS OF 1989 HOME ECONOMICS STUDENTS

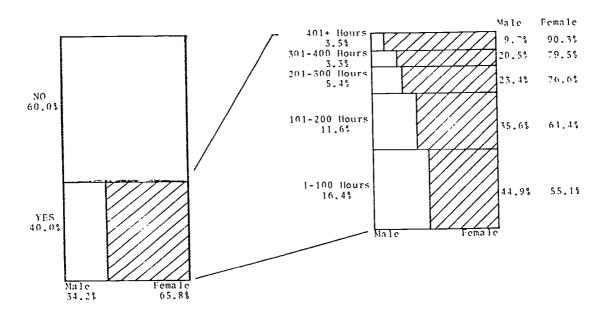

Home Economics classes were selected by **forty percent** of the 14,636 students who participated in the follow-up study. The data reported in this section include the 5,861 students who completed one or more courses in the curriculum category of Home Economics.

34.2 percent of these Home Economics students were male, and 65.8 percent were female. Of these students surveyed, seventy-six percent responded with a completed, or substantially completed, questionnaire. Courses in this curriculum category include, but are not limited to: Child Development, Clothing and Textiles, Consumer Education, Home Management, Family Life and Foods.

Of the 5,861 Home Economics students, 4,076 had from 1 to 200 hours of courses; 1,272 students had courses totaling 201 to 400 hours; and 513 had 401 or more hours of course work. The total percentage of students who had selected any Home Economics courses decreased 2.9 from the Class of 1988 study.

CLASS OF 1989 INDUSTRIAL TECHNOLOGY STUDENTS

Industrial Arts classes were selected by **29.7 percent** of the 14,636 students who participated in the follow-up study. The data reported in this section include the 4,340 students who completed one or more courses in the curriculum category of Industrial Technology.

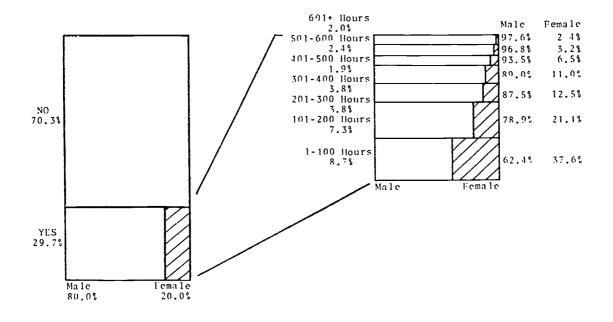

Eighty percent of these Industrial Technology students were male, and twenty percent were female. Of these students surveyed, 78.5 percent responded with a completed, or substantially completed, questionnaire. Courses in this curriculum category include, but are not limited to: Construction, Electricity, Graphic Arts, and Industrial Design.

Of the 4,340 Industrial Technology students, 2,334 had from 1 to 200 hours of courses; 1,100 students had courses totaling 201 to 400 hours; and 906 had 401 or more hours of course work. The total percentage of students who had selected any Industrial Technology courses decreased 5.3 from the Class of 1988 study.

CLASS OF 1989 MATHEMATICS STUDENTS

Mathematics classes were selected by 91.9 percent of the 14,636 students who participated in the followup study. The data reported in this section include the 13,445 students who completed one or more courses in the curriculum category of Mathematics.

Fifty percent of these Mathematics students were male, and fifty percent were female. Of these students surveyed, 78.2 percent responded with a completed, or substantially completed, questionnaire. Courses in this curriculum category include, but are not limited to: College Algebra, General Mathematics, Geometry, and Trigonometry.

Of the 13,445 Mathematics students, 3,556 had from 1 to 200 hours of courses; 4,697 students had courses totaling 201 to 400 hours; and 5,192 had 401 or more hours of course work. The total percentage of students who had selected any Mathematics courses decreased 3.2 from the Class of 1988 study.

CLASS OF 1989 MUSIC STUDENTS

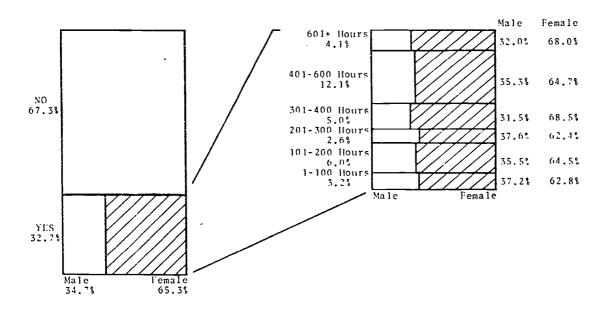

Music classes were selected by 32.7 percent of the 14,636 students who participated in the follow-up study. The data reported in this section include the 4,787 students who completed one or more courses in the curriculum category of Music.

34.7 percent of these Music students were male, and 65.3 percent were female. Of these students surveyed, 82.1 percent responded with a completed, or substantially completed, questionnaire. Courses in this curriculum category include, but are not limited to: Band, Choir, Music Literature, and Music Theory.

Of the 4,787 Music students, 1,335 had from 1 to 200 hours of courses; 1,104 students had courses totaling 201 to 400 hours; and 2,348 had 401 or more hours of course work. The total percentage of students who had selected any Music courses increased 0.8 over the Class of 1988 study.

CLASS OF 1989 NATURAL SCIENCE STUDENTS

Natural Science classes were selected by **90.4 percent** of the 14,636 students who participated in the follow-up study. The data reported in this section include the 13,233 students who completed one or more courses in the curriculum category of Natural Science.

49.7 percent of these Natural Science students were male, and 50.3 percent were female. Of these students surveyed, 78.2 percent responded with a completed, or substantially completed, questionnaire. Courses in this curriculum category include, but are not limited to: Chemistry, Conservation, General Biology, Geology, and Physics.

Of the 13,233 Natural Science students, 4,965 had from 1 to 200 hours of courses; 4,475 students had courses totaling 201 to 400 hours; and 3,793 had 401 or more hours of course work. The total percentage of students who had selected any Natural Science courses decreased 2.6 from the Class of 1988 study.

CLASS OF 1989 OFFICE OCCUPATIONS STUDENTS

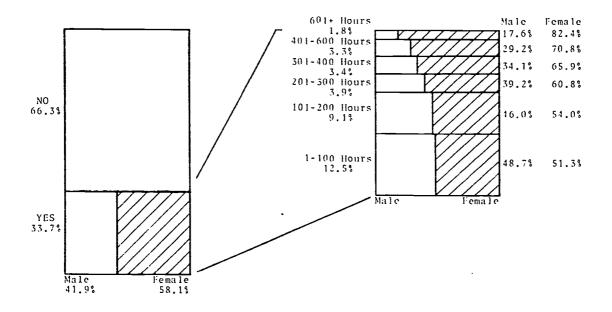

Office Occupations classes were selected by 33.7 percent of the 14,636 students who participated in the follow-up study. The data reported in this section include the 4,938 students who completed one or more courses in the curriculum category of Office Occupations.

41.9 percent of these Office Occupations students were male, and 58.1 percent were female. Of these students surveyed, 74.6 percent responded with a completed, or substantially completed, questionnaire. Courses in this curriculum category include, but are not limited to: Data Processing, Advanced Accounting, Advanced Typing, Business Technology and Micro Computer Applications.

Of the 4,938 Office Occupations students, 3,148 had from 1 to 200 hours of courses; 1,048 students had courses totaling 201 to 400 hours; and 742 had 401 or more hours of course work. The total percentage of students who had selected any Office Occupations courses increased 8.5 over the Class of 1988 study.

CLASS OF 1989 SERVICE OCCUPATIONS STUDENTS

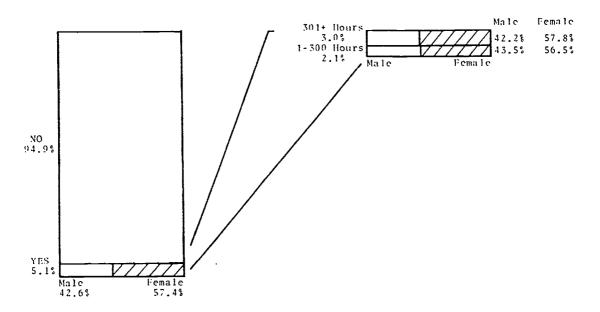

Service Occupations classes were selected by **5.1 percent** of the 14,636 students who participated in the follow-up study. The data reported in this section include the 746 students who completed one or more courses in the curriculum category of Service Occupations.

42.6 percent of these Service Occupations students were male, and 57.4 percent were female. Of these students surveyed, 75.2 percent responded with a completed, or substantially completed, questionnaire. Courses in this curriculum category include, but are not limited to: Child Care, Food Services, Personal Services, and Protective Service.

Of the 746 Service Occupations students, 247 had from 1 to 200 hours of courses, 278 students had courses totaling 201 to 400 hours; and 221 had 401 or more hours of course work. The total percentage of students who had selected any Service Occupations courses increased 1.5 over the Class of 1988 study.

CLASS OF 1989 SOCIAL STUDIES STUDENTS

Social Studies classes were selected by **ninety-five percent** of the 14,636 students who participated in the follow-up study. The data reported in this section include the 13,906 students who completed one or more courses in the curriculum category of Social Studies.

49.9 percent of these Social Studies students were male, and 50.1 percent were female. Of these students surveyed, 77.7 percent responded with a completed, or substantially completed, questionnaire. Courses in this curriculum category include, but are not limited to: American Government, Economics, General Psychology, and Modern History.

Of the 13,906 Social Studies students, 398 had from 1 to 200 hours of courses; 2,486 students had courses totaling 201 to 400 hours; and 11,022 had 401 or more hours of course work. The total percentage of students who had selected any Social Studies courses decreased 3.3 from the Class of 1988 study.

CLASS OF 1989 TRADE AND INDUSTRIAL EDUCATION STUDENTS

Trade and Industrial classes were selected by 21.9 percent of the 14,636 students who participated in the follow-up study. The data reported in this section include the 3,206 students who completed one or more courses in the curriculum category of Trade and Industrial.

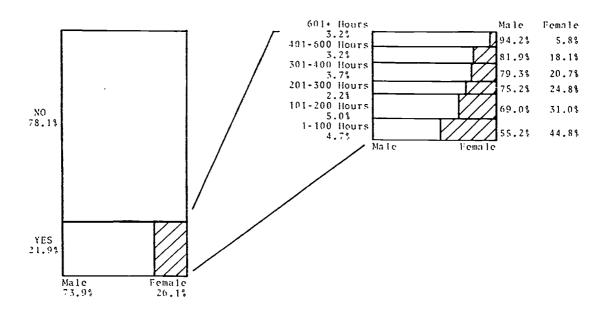

73.9 percent of these Trade and Industrial students were male, and 26.1 percent were female. Of these students surveyed, 67.6 percent responded with a completed, or substantially completed, questionnaire. Courses in this curriculum category include, but are not limited to: Graphics, Machine Shop, Automotive Mechanics, Carpentry, and Drafting.

Of the 3,206 Trade and Industrial students, 1,418 had from 1 to 200 hours of courses; 866 students had courses totaling 201 to 400 hours; and 922 had 401 or more hours of course work. The total percentage of students who had selected any Trade and Industrial courses increased 4.7 over the Class of 1988 study.

Chapter 5:

EMPLOYER FOLLOW-UP CLASS OF 1989

One of the components of the system is the Employer Follow-up. It is felt that employers of recent high school leavers can provide school decisionmakers with valuable information for consideration in future program planning and development.

An Employer Follow-up Form was mailed to the employer of any respondent who indicated employment and provided sufficient information to contact the employer. The responses of 853 employers are represented.

		Very Good	Good	d Average	Poor	Very Poor
1.	Rating of student's technical knowledge	27.9%	42.8	% 22.2%	5.2%	1.8%
2.	Rating of student's work attitude	41.5%	34.7	% 15.2%	5.5%	3.0%
3.	Rating of student's work quality	36.7%	38.7	% 17.7%	4.3%	2.5%
4.	Overall rating of <u>education</u> received by this student as it pertains to the requirements of the job	27.6%	46.3	% 20.3%	3.9%	1.9%
5.	Rating of student's preparation in relation employees doing similar work?	n to other			n	14.3% 38.9% 41.8% 5.0%
-	Student has demonstrated	Strongly Agree	Agree	No Opportunity to Observe	Disagree	Strongly Disagree
6.	the ability and willingness to learn new skills and concepts	36.2%	49.8%	2.9%	7.8%	3.4%
7.	adaptability to changing job situations	30.6%	51.8%	6.4%	8.5%	2.7%
